HTML Links (<a> tag)

A link connects one resource to another. It's how the web becomes a network, not just a document.

Learn HTML

Best Practice with Key Attributes
**
    Go to Google
  **

Why rel="noopener noreferrer"?
Security. It prevents the new page from accessing your page via JavaScript.

- href   Destination URL
- target="_blank"   Opens in new tab
- title   Extra info on hover

Types of Links
<!-- External Link -->
  Facebook

  <!-- Internal Link -->
   About Me

   <!-- Anchor Link -->
  Section 3

HTML Images (<img> tag)

Images are not containers — they are self-closing elements.

<img src="./HTML5_logo.png" alt="HTML Logo" width="300px" height="300px">

Key Attributes
- Attribute: Purpose
- src: Image source
- alt: Accessibility + SEO
- width / heigh: Size control

Absolute vs Relative Path

<!-- Absolute: -->
<img src="https://upload.wikimedia.org/wikipedia/commons/thumb/6/61/HTML5_logo_and_wordmark.svg/250px-HTML5_logo_and_wordmark.svg.png">

<!-- Relative: -->
<img src="./HTML5_logo.png" alt="HTML Logo" width="300px" height="300px">

Make Image Clickable

<!-- Make Image Clickable -->

<img src="./HTML5_logo.png" width="300px" height="300px">
